

Frognal Estates

Alderwood Water & Sewer in April 2019

Independent Consultant STC Confirms:

- Applying high pressure drilling mud across potential landslide failure planes is very high risk and should be avoided;
- The plans (12-18-18) is not constructible as designed;
- Drilling blow outs are likely; and
- Frognal has yet to submit a revised design of how to construct the sewer for *THREE-QUARTERS* of its project.
