

Snohomish County is proposing to route most of the traffic from Locust Way to 228th St SW through your neighborhood. This will bring arterial traffic with increased noise, headlight glare, and greatly increase the risk of accidents. Why? just to shave off about 30-seconds of commute time for residents living north on Locust Way and promote more development.

This project, costing over \$3-million and will destroy a valuable wetland and wildlife habitat. Wetland mitigation is proposed in Little Bear Creek, where it will not mitigate the impacts to Swamp Creek.

What can you do?
